

Module 6: Video 1 Transcript, Multisensory Learning

An Introduction to Multisensory Rooms

Many schools have wonderful sensory corners, a but dedicated multi-sensory room can be a great option for some schools.

They come in all shapes, sizes, complexities and costs.

For those on a bigger budget, they can be designed and installed by a professional sensory company, or an audio-visual company can supply and fit the equipment.

But these days, many sensory rooms can be created with less expensive equipment at a cheaper cost.

Although a professionally installed room is fantastic, you can sometimes create amazing spaces on a much smaller budget as you will see in this module.
